

# VERTICAL MATERIAL LIFT- ELEVATOR

Do not use the lift as a personnel carrier. It is designed to

**LIFT MATERIAL ONLY!**

- Keep all body parts clear of any moving or jammed parts on the lift.
- Do not use a damaged or malfunctioning lift.
- Do not use a lift with a worn, kinked or damaged wire rope.
- Never allow unauthorized personnel to operate the lift.
- Do not remove any guarding or enclosure panels.

## Loading and Lifting Procedures

- **WARNING!** Do not operate the lift beyond its rated load capacity. (Load capacity is shown on signs located on the safety gates).
- Center all loads on the platform. The load must be secure during travel.
- Do not allow the load to protrude outside of the platform.
- The load must be a minimum of 2" from the edge of the access ends.
- Enclosure gates must be closed when operating the lift.
- Safety enclosures are required on all lifts per ANSI Regulations.
